

\*I can ask a question to  
sort a collection into two  
sets.

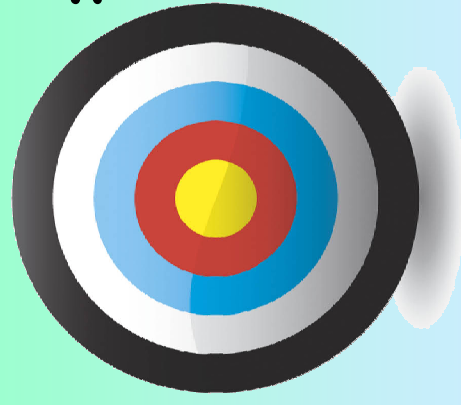

\*I can draw a branching  
tree to sort objects in a  
collection.

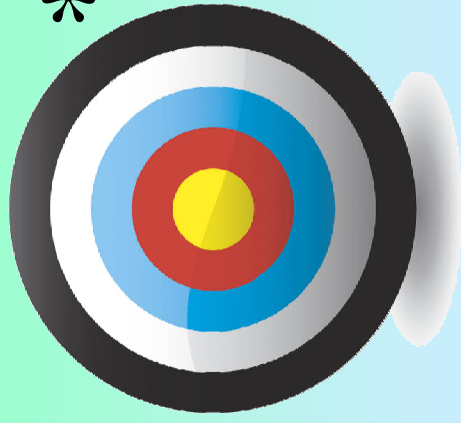

\*I can ask a question to  
sort two objects in a  
branching database.

\*I can search a branching  
database on the computer  
to identify objects.

\*I can create a branching  
database which I can use to  
identify any object in a collection.
