The Vet

www.communication4all.co.uk

**A vet is a special
type of doctor who
looks after animals
and helps them get
better when they
are ill.**

**When your pet is ill
you can take them
to see the vet. A
vet works in a
place called a
surgery.**

**A person called a
receptionist will
ask who you are
and write down
your pet's name.**

**There is a place
for you to sit down
with your pets and
wait your turn.**

**The vet will see
your pet when it is
your turn.**

**Sometimes the vet
will be helped by a
nurse.**

If your pet has to stay in for a little while, there is a safe place at the vet's surgery.

**The vet's nurse will
check on your pet
and make sure it is
getting better.**

**When your pet is
better you will be
able to take him
home.**
