

'I Can...' Science statements: **Materials**

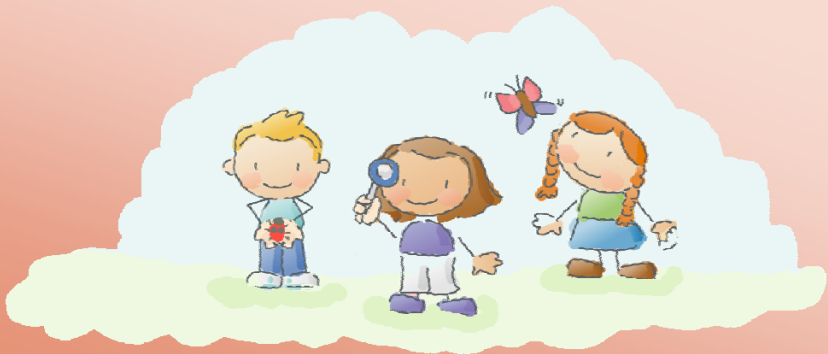

Level 3

I know that materials e.g. wood, have lots of uses e.g. furniture, cookery tools and toys.

'I Can...' Science statements: **Materials**

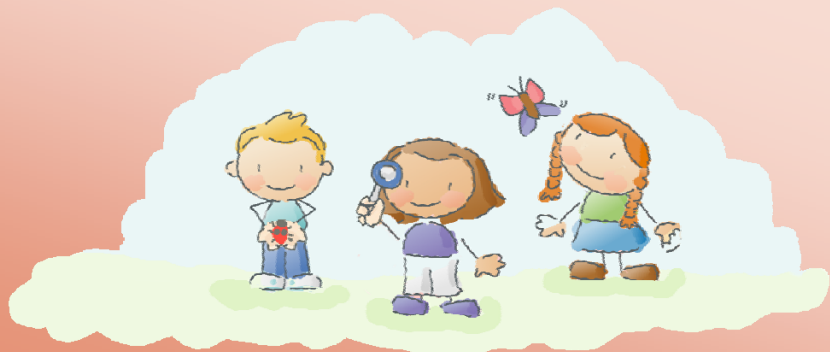

Level 3

I can explain why some materials are best for and used for certain jobs. e.g. glass for windows.

'I Can...' Science statements: **Materials**

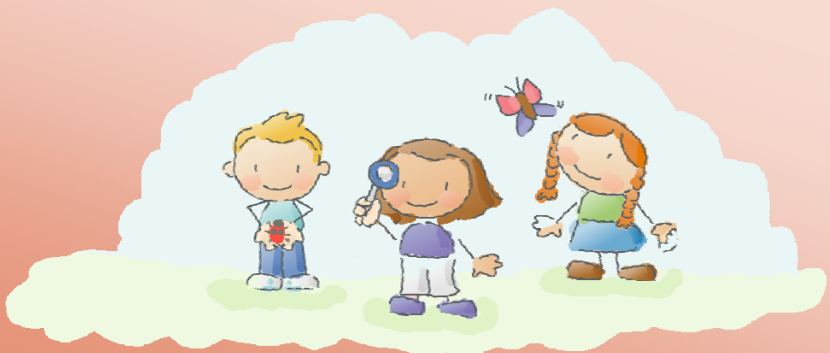

Level 3

I can sort materials by magnetic properties.

'I Can...' Science statements: **Materials**

Level 3

I can explain which sorts of materials are attracted to a magnet.

'I Can...' Science statements: **Materials**

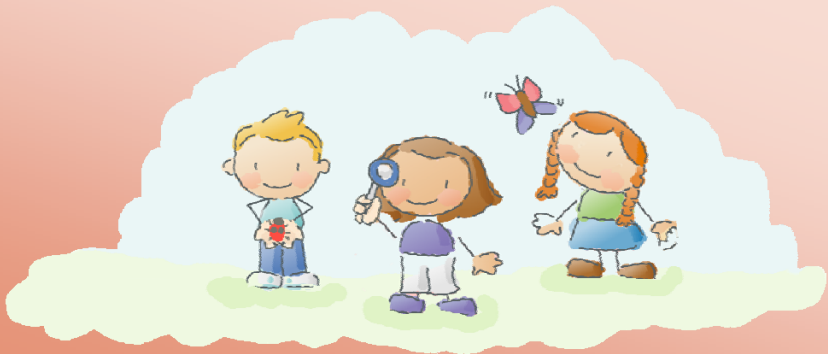

Level 3

I can sort materials into good and bad conductors of electricity.

'I Can...' Science statements: **Materials**

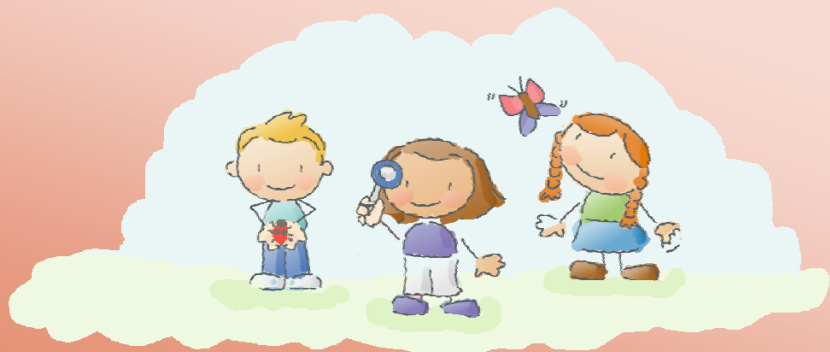

Level 3

I can explain which sorts of equipment are important to make a circuit.

'I Can...' Science statements: **Materials**

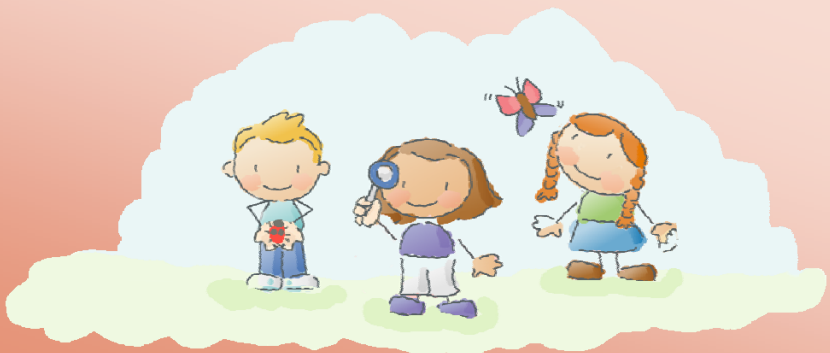

Level 3

I can identify which materials are best for a specific purpose: e.g. making a pan.

'I Can...' Science statements: **Materials**

Level 3

I can identify and explain if something is a liquid, a solid or a gas.

'I Can...' Science statements: **Materials**

Level 3

I know that if I freeze water it will become ice and if I melt ice it will become water again.

'I Can...' Science statements: **Materials**

Level 3

I have observed and can explain some reversible changes.

'I Can...' Science statements: **Materials**

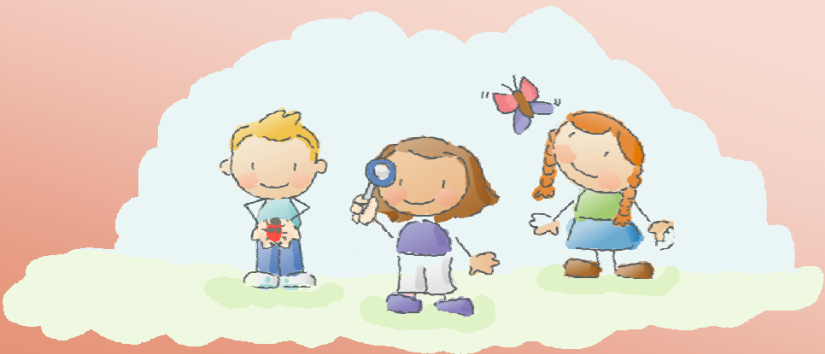

Level 3

I know that if I bake clay or cakes they are changed for ever and cannot go back to the way they were.

'I Can...' Science statements: **Materials**

Level 3

I have observed and can explain some irreversible changes.
